

VULPEX *Liquid Soap*

- Non-acid
- Non-foaming
- Non-corrosive
- Non-hazardous
- Germicidal

Vulpex cleans materials ranging from feathers, costumery, leather, carpets and furniture to oil paintings, armour, precious metals, shell, marble and stone.

Prior to use, Vulpex must be mixed with water or solvent (Stoddard's / mineral spirit).

A safe, non-foaming, acid-free and germicidal cleaner, non-corrosive & non-hazardous for practically everything from paper to stone.

Vulpex liquid soap is a safe cleaner for practically everything, from paper to stone.

Vulpex rinses away completely.
Not harmful to health or property.

Since its introduction in 1970, its extraordinary versatility has made Vulpex a popular and indispensable medium in all branches of professional restoration and conservation of the fine arts and historic property.

It has been used with eminent success in the safe and controllable cleaning of materials ranging from feathers, costumery, leather, carpets and furniture to old paintings, armor, precious metals, shell, marble and stone.

How VULPEX Works:

VULPEX attacks and emulsifies dirt, fats, fatty oils, mineral oils, waxes, and hydrocarbons with great speed and efficiency. These dirty emulsions are remarkably stable, thus easily disposable. micro-fine cracks harboring dirt are subject to a deep-cleansing action rarely achieved with normal commercial cleaners.

Compared with harsh, acid-based cleaners, alkaline **VULPEX is not harmful to health or property**. A final rinse or wipe with clean water neutralizes the surface, leaving behind nothing to create future conservation problems.

Usage:

VULPEX is supplied as a dense concentrate. **VULPEX must be diluted before use**. For normal aqueous cleaning one part soap to six or seven parts cold tap water (by volume) is sufficient. More water can be added if the soiling is light.

When the job demands a non-aqueous cleaning system (for example; when removing grime from leather) VULPEX, uniquely, can be blended with mineral spirit (Stoddards solvent) instead of water. As a spirit soap, one part VULPEX in ten to twenty parts solvent will be found effective.

CAUTIONS:

Since VULPEX is a highly efficient de-greaser, hands should be protected against the loss of natural oils by wearing gloves or the subsequent use of a lanolin hand-cream.

Eyes should be protected from splashes.

VULPEX Liquid Soap **CONCENTRATE**

*[Potassium Methyl Cyclohexyl Oleate]
available in: 100 ml.. 250ml .. 1 Liter*
